

# The Finishing Touch

## *A Complete Range Of Laminators For Digital Graphics Applications*

- **PEACH**

*Entry level laminators for low to mid-volume production runs*

- **SKYLAM**

*Robust mid-volume laminators for professionals*

- **SEAL**

*Mid/High volume laminators for long production runs*

- **CREST**

*Robust High volume laminators where speed and robustness are paramount*

- **CREST - Special Laminator Range**

- *UV output laminators w special rollers*
- *2m wide laminators*

# “The Finishing Touch”

## PEACH MagiCool Laminator – 1650mm Cold Laminator

1650mm wide 2 x Roll Cold Laminator

Silicone Rollers

Robust DC Geared Motor

Simple layout of electrical / electronics for easy maintenance

**Peach Magiccool 1650**

**POA**

## PEACH MagiArt Laminator – 1650mm Hot/Cold Laminator

1650mm wide 4 x Roll Hot/Cold Laminator

Silicone Rollers

Robust DC Geared Motor

Simple layout of electrical / electronics for easy maintenance

4 Rollers give better pressure for better lamination

Heat Assisted Cold Lamination for better finishing +

**Hot Lamination (Encapsulation)**

**Peach MagicArt 1650**

**POA**

## PEACH Skylam Laminator – 1120mm Hot/Cold Laminator

1120mm wide 4 x Roll Hot/Cold Laminator

Silicone Rollers

Robust DC Geared Motor and robust construction

Enhanced electronics and independent control of heaters

4 Rollers give better pressure for better lamination

Heat Assisted Cold Lamination for better finishing

**Hot Lamination (Encapsulation)**

*Ideal for  
Photo-labs*

**Peach Skylam 1120HC**

**POA**

# “The Finishing Touch”

## PEACH Skylam Laminator – 1650mm Hot/Cold Laminator

1650mm wide 4 x Roll Hot/Cold Laminator

**BEST VALUE** Silicone rollers (Extra wide)

Very robust build

Robust DC Geared Motor and robust construction

Enhanced electronics and independent control of heaters

4 Rollers give better pressure for better lamination

Heat Assisted Cold Lamination for better finishing

**Hot Lamination (Encapsulation)**

Peach Skylam 1650HC

POA

## Seal Image 62 Series – Mid/High Volume Laminator

1575mm wide laminator with 2 x Rollers

Available as 2 x Cold Rollers or 1 x Cold and 1 x Heated Roller for better lamination effect

Hassle free lamination for mid-volume runs

2.5N/mm line pressure

3m/min lamination speeds

Seal Image 62C x 2 Cold Rollers

POA

Seal Image 62S x Top Roller Heated and Bottom Roller Cold

POA

## “The Finishing Touch”

### CREST ES1600 Series – **Heavy Duty Laminator Series**

1600mm wide laminator with 2 x rollers

Available as 2 x Cold Rollers or 1 x Cold and 1 x Heated Roller for better lamination effect

Robust, industrial design

Perfectly crowned roller technology ensures hassle free long lamination runs and flat mounting

Simple electrical layout (just 2 electronic boards) covering all motor and safety functions ensure easy

4N/mm line pressure for un-paralleled lamination

5m/min lamination speeds

**“Currently used by major sign makers who value hassle-free continuous long-run lamination”**

**Crest ES1600C x 2 Cold Rollers**

**POA**

**Crest ES1600S x Top Roller Heated and Bottom Roller Cold**

**POA**

### CREST TS 1400/1600 - **UV Output Laminator**

The Crest TS 1400/1600 laminator is a machine for high-quality lamination using heat and high pressure. The laminator can be partnered with any UV-curable inkjet printer (suitable for all ink jet and solvent output too).

The machine is special developed to apply a protective laminate on top of UV printed substrates.

The Crest TS 1400/1600 operates without compressed air and accepts boards, sheets and roll material.

- High output speed
- Maximum roll diameters up to 350mm (14 inch)
- Maximum laminating width 1400mm/1600mm (55, 62 inch)
- High laminating pressure
- Digital pressure readout
- Industrial design

**Crest TS1600 x 1 Top Hot Roller with fixed temperature control (50°C max)**

**POA**

**Crest TS1600 x 1 Top Hot Roller with variable temperature control (0 - 135°C max)**

**POA**

## “The Finishing Touch”

### **CREST Modular Laminating Concept (MLC) – Up to 2m Wide**

The MLC has been designed for high quality adhesive coating, panel mounting, laminating and encapsulating of images. Thanks to the well-developed modular design and the availability of many options and upgrade kits, the machine can be adapted to meet a client's specific needs.

MLC specifications:

- Working width available: 1200, 1400, 1600 or 2000mm
- Laminating rollers: 2 or 4 rollers
- Heatable rollers: 1 or 2 rollers (max. 135°C)
- Winding positions: max. 3 top- and 3 bottom positions
- Laminating speed: 8 m/min
- Other options on request

“Currently 2 Installations of MLC2000 (2m wide) in Singapore”

Crest MLC Series prices upon application...depending on roller width and options.
